

1. Discuss the factors that make a good agile team
2. Discuss the bad factors that lead to software project failure
3. Discuss the critical practices in software project management
4. Write and explain the data dictionary model for the Crypto Trading System
5. Write and discuss the role of data dictionary in Car Parts
6. Explain the Factors considered when selecting the project team structure
7. Explain the product scope, project scope
8. Explain Class diagram with Aggregation for a petrol bunk
9. Explain Class diagram with Generalization for petrol bunk
10. Explain the three system organizational styles with respect to LIBSYS Software
11. A startup is developing a Website. The following details are available:
 Count Total (TC) [UFP]= 300
 Sum of processing complexity factors $\Sigma(f_i) = 33$
 1 FP = 50 LOC
 Productivity = 14 FP/person-month
 Labor cost = ₹90,000 per month per developer
 Calculate:
 I. Value Adjustment Factor (VAF)
 II. Function Point Estimate (FP)
 III. Size in LOC
 IV. Effort required in person months
 V. Project Cost using both FP and LOC methods(total cost)
12. Design the state machine model by considering Hair Dryer Machine
13. What are Object Models Explain with diagram
14. Write Sequence model for Insulin Pump
15. Write Use Case model for Petrol Pump
16. Explain multiple inheritance with hierarchy diagram
17. Explain CASE work benches
18. Explain architectural system characteristics
19. Explain packing robot system with a block diagram
20. List and Explain few architectural decisions
21. Explain film and picture library with Client Server Model
22. Explain Control Styles and Types
23. Explain OSI model with the help of Reference architectures
24. Explain the characteristics of OOD
25. Explain transponder object with a neat Java code
26. Explain whether mapping system with a subsystem diagram
27. Explain whether station with a use case diagram
28. Identify the various approaches to Object Identification
29. Explain how design evolution works by adding pollution monitoring feature
30. Explain the organisational paradigms suggested by Constantine
31. Explain different types of Estimation techniques
32. Explain COCOMO model
33. List and explain the stakeholders involved in software project management
